CONTENTS

Volume 26, Issues 1–6

International Journal of
MATHEMATICAL EDUCATION in SCIENCE and TECHNOLOGY

Issue No. 1, JANUARY

Editorial Announcement—Special Anniversary Year. D. WALKER 1

An individual self-study system in a numerical mathematics course based on educational software. P. WILDERS, S. R. BUIS and L. J. M. ROTHKRANTZ 3

Applying 'short' computer programs to elementary mathematics for children. A. PANOUTSOPOULOS and D. POTARI 11

Measuring mathematical model building abilities. M. G. VOSKOGLOU 29

Numerical quadrature formulas through the theory of analytic functions. Y.-K. KWOK and K.-K. TAM 37

Rotations, complex numbers and quaternions. C. TZANAKIS 45

A modified approach to the large amplitude free vibration of parabolic plates. A. PAL and R. K. BERA 61

Teaching, learning and assessment in large classes. B. A. CHANSARKAR ... 69

Some observations concerning third- and fourth-order iterative methods. J. MELVILLE 75

On the 'Fundamental theorem of Algebra'. T. W. LEUNG 83

A beginner's guide to the Hilbert transform. J. M. H. PETERS 89

The Fermat machine. H. W. AUSTIN 107

Determination of equivalent thermal response parameters for evaluating the structural response of beams subjected to transient thermal environments. D. J. O'CONNOR and B. W. SCOTNEY 111

How are they getting there? M. RYCRAFT and M. D. STERN 131

Interactive calculations on geometric figures. H. SCHUMANN 143

Classroom notes 151

Issue No. 2, MARCH

Computer support for students' work in a formal system: MacPICT. S. REEVES 159

The Newton–Raphson method. J. VERBEKE and R. COOLS 177

On the use of skeletal notes. R. A. D'INVERNO 195

Continued fractions for $\sqrt{d}$ with constant partial quotients. K. E. HIRST ... 205

Testing the goodness of approximation to the Mitscherlich model via its variants. E. C. NDUKA 213

A cross-national comparison of programmes for the preparation of secondary school mathematics teachers at selected institutions in the People's Republic of China and the United States. B. J. FERRUCCI, YEPING LI and J. A. CARTER ... 219

Effects of spiral testing and review on retention and mathematical achievement for below-average eighth- and ninth-grade students. J. N. WINELAND and L. STEPHENS 227

A generalized dual of Napoleon's theorem and some further extensions. M. D. DE VILLIERS and J. H. MEYER 233

Teaching of functions via algebra Graf(x). A. C. NYONDO and J. GESA 243

Self-study for decision mathematics. N. PRICE 249

The common content of a sphere and a regular tetrahedron having a common centre. W. A. RICHARDS 257

Classroom notes 267

Issue No. 3, MAY

Editorial. D. WALKER 315

Mathematical education at European universities of technology. L. RÅDE ... 321

Radioactive labelled insulin kinetics. A. G. SHANNON, C. K. WONG, J. VORA and D. R. OWENS 329

Multiculturalism and mathematics education. U. D'AMBROSIO 337

Technology for deciding the convergence of series. S. ABRAMOVICH 347

The introduction of discrete mathematics into the school curriculum. D. BURGHES 367

Geophysically motivated inverse problems for the classroom. C. W. GROETSCH 379

Numeracy and further education: beyond the millennium. J. O'DONOGHUE ... 389

Development in mastering of rational number concepts and rational number operations: the role of gender, cognitive style and intellectual skills. V. PICCIARELLI, M. DI GENNARO, A. LOCONSOLE and R. STELLA 407

Mathematics as a didactical adventure. A. DUNKELS 417

Colouring Powers of Paths. J. SENIOR and J. WILSON 431

The use of moving averages in international financing. T. C. T. KOTIAH ... 439

Values, gender and images of mathematics: a philosophical perspective. P. ERNEST... 449

The effectiveness of videotapes in the individualized instruction of intermediate algebra and college algebra. J. F. RECH, S. M. JUHLER and H. L. JOHNSON 463

Issue No. 4, JULY

A study of teaching mathematical concepts with computers. P. K. TRINGA and E. A. LIPITAKIS 473

Mathematics teaching modules for the senior secondary education system in Nigeria—a focus on applied mathematics. S. I. EMENALO and D. O. IHEJIETO 489

Congruence of symmetric matrices. J. M. DE OLAZÁBAL 495

Metaphors for time-series analysis. D. S. G. POLLOCK 501

Building up the self-confidence of mathematics students in non-science courses. C. VARSAVSKY and P. NORTON 517

Teaching control: A control strategy for graphing functions. F. GRANDSARD ... 523

Some aspects of teachers' and students' views on student reasoning and knowledge construction. R. EVEN and Z. MARKOVITS 531

A weighted fuzzy similar choice method for ranking a set of alternatives with multiple criteria. Y. LIU and Y. SHI 545

A resolution of the 'exchange paradox'. K. C. CHAE 553

Parallelism in performance and the multifactor perspective to the instructional process—a case study of poor achievements in mathematics in a single-sex school setting. D. O. IHEJIETO 559

The effectiveness of a computer-assisted learning programme in engineering mathematics. D. A. LAWSON 567

The evaluation of specific types of integrals involving confluent hypergeometric functions. F. DI MARZIO 575

How many possible closed hexagons?—A mathematical problem from the Tri-Ominos game. T. FU-SU 581

Solution of ordinary differential equations by successive integration by parts. Z. REUT 589

Hypermedia and animation in CACSD education. J. MULTISILTA and S. POHJOLAINEN 599

Classroom notes 619

Issue No. 5, SEPTEMBER

Study of a deterministic model in the theory of contagious disease. J. CALDWELL and Y. M. RAM 639

On the particular integral of a geophysical problem and the interval of uncertainty. D. O. IHEJIETO 647

Determining periodicity: a case study of a functional specification. V. J. RAYWARD-SMITH and A. E. OMAR 655

A problem on the turning points of polynomials. R. THOMPSON 675

Solving non-linear systems of equations involving non-negative variables. J. Y. WONG 685

The development of modelling skills in linear programming. K. DARBY-DOWMAN 693

What a matrix isn't. P. J. MAHER 703

Investigating brachistochrone trajectories with a multistage real-parameter genetic algorithm. D. S. SZARKOWICZ 709

Problem solving as modelling: a case of augmented-quotient division problem. K. NUNOKAWA 721

Computing mean first passage times for a Markov chain. T. J. SHESKIN ... 729

A note on singular integral equations. A. CHAKRABARTI 737

Total quality management in the classroom: applications university-level mathematics. F. WILLIAMS 743

The dependence of marks on workload. R. T. GILES 749

Classroom notes 755

Issue No. 6, NOVEMBER

The generation and analysis of Pythagorean triples within a two-parameter grid. J. V. LEYENDEKKERS and J. RYBAK 787

Training in the law of large numbers and everyday inductive reasoning: a replication, with implications for statistics course design. K. BEATTIE ... 795

Acceleration in general curvilinear coordinate systems. T. T. CHIA and F. C. CHIA 809

The raindrop theory of arms growth. J. P. KING and C. B. Joynt 821

On emphasizing variance in the teaching of analysis of variance designs. B. S. GORMAN and L. H. PRIMAVERA 835

Investigating chaos with a spreadsheet. D. CHAPPELL and K. DURY 845

Mindstorms or a storm in a teacup? A review of research with Logo. N. YELLAND 853

Gender and school-type differences in mathematics achievement of senior three pupils in central Uganda: an exploratory study. P. OPYENE-ELUK and C. OPOLOT-OKURUT 871

Problem solving: discovery stage format. A. C. BUXKEMPER and D. J. HARTFIEL 887

Estimating missing observations in ANOVA. J. F. REYNOLDS 895

Classroom notes 903
